

Jackpot!

Take a risk and gamble on this one-armed bandit. It has the looks of a slot machine from the roaring twenties but from the inside it is full of human ingenuity. Insert a coin, pull the handle and the machine will start to spin. One by one, three odd characters will pass by. They will decide if you're lucky. What will it be? Grapes, lemons, cherries or four leaf clovers. Three in a row is JACKPOT! It is permitted to complain about the results. Jackpot is unpredictable but human, too...
